Summary

Data & Business Analyst with a medical device engineering background and an MBA in supply chain risk management. Built a relational tracking system for 100+ medical devices across 30+ hospitals; completed an end-to-end supply chain analytics project on the Olist dataset (SQL, BigQuery, Power BI). Seeking a Data or Business Analyst role in HealthTech, e-commerce, or logistics.

Education

University of Applied Sciences and Arts Northwestern Switzerland

Management Consulting

Progress: (5.0/6.0)

Master of Business Administration • 5.0/6.0

Ho Chi Minh City • 07/2021 - 11/2024

Thesis: Improving firm performance of Biomedical equipment distributors in Vietnam through Supply chain risk management. (5.5/6.0)

HCMC University of Technology

Engineering Physics

Thesis: Analysis of the brain's response to stimulus signals

Bachelor of Engineering • Thesis: 9.42/10

Ho Chi Minh City • 2014 - 2019

Experience

ETC Medical Equipment Co., Ltd

Service Engineer

Ho Chi Minh City

09/2025 - Now

- Serviced endoscopy equipment (scopes, light sources, processors) for hospital clients across southern and central Vietnam — intake, inspection, installation, and fault resolution with the manufacturer.
- Designed and built a relational equipment-tracking application (AppSheet, star schema) managing the full lifecycle of over 150 endoscopy units across over 40 hospital clients and 12 categories, replacing manual Excel tracking.
- Modeled three linked tables (equipment transitions, product records by hospital, contacts) with relational references, computed fields, and photo documentation to keep data accurate and verifiable.
- Produced analysis from the tracked data, including equipment distribution by type, to surface which scope categories move most frequently.

Anh Khoa Medical Equipment Co., Ltd

Application Engineer

Ho Chi Minh City

03/2019 - 07/2022

- Compared product configurations against tender requirements to support bid preparation for medical equipment.
- Maintained and reviewed equipment configuration records to ensure accuracy across procurement documentation.
- Presented product capabilities to prospective clients and supported vendor engineers during equipment demos and delivery.

Anh Khoa Medical Equipment Co., Ltd

Ho Chi Minh City

1. Documented product specifications and reviewed internal workflows to support equipment tracking.

Projects

Olist E-commerce & Logistics Analytics

2026

SQL · BigQuery · Power BI

- Ingested and profiled a multi-table e-commerce dataset in BigQuery; built two validated mart tables for delivery and order-item analysis.
- Analyzed the delivery chain to surface delayed and stuck orders, then visualized findings in a Power BI dashboard.

Michelin Guide Restaurant Distribution Analysis

2021

1. Analyzed global distribution of Michelin-starred restaurants to identify geographic concentration and disparities.
2. Examined variation in star ratings (1–3 stars) across regions, the most expensive and cheapest dishes in Michelin restaurants, the attractive rank of dishes served in these restaurants.
3. Derived insights on regional representation and potential market gaps in the global fine-dining landscape.
4. Presented findings through visualizations to support data-driven interpretation of industry patterns.
